## WEB SITE DESIGN PROJECT

Design and host a full functioning web site. All links MUST be working. Your website will be viewed online on the day of your presentation/defense

Below is a demo ICT Firm's web site.

**Digital Revolutzn DR**

**Contact**  
You can contact us or fill our enquiries/comments form in regards to our product range. [Click here...](#)

Done, but with errors on page. Computer | Protected Mode: Off 100%

This Web site was built using Macromedia Dreamweaver, Fireworks and Flash. The site has 6 pages, they are; Home page, About Us page, Products page, Faq's page, Enquiries page and Contact Us page.

This demo web site comes with a project folder that contains the index page, index.jpg, the flash elements for the slide shows and an images folder. Inside the images folder you have all the pictures for the slides, for the rollover images (links) and for other fireworks design.

You have to use a different color other than the color used here for your website design, for the page background, for the side background, for the rollover images and for the header texts.

Create all the pages and link all of them.
